This module provides a comprehensive understanding of structural repairs as applied to metallic and non-metallic items.

**Highlights**

- Structural repairs in practice
- Industrial expertise

**Prerequisites**

- Aircraft architecture and structure knowledge;
- Engineering background.

**Learning objectives**

After completing this course, participants will be able to:

- Describe structural repair process and techniques;
- Analyze a structural repair manual.

**Key elements**

- Period: Late October
- Estimated Duration: 10 hours
- For whom: recent graduates, jobseekers and experienced employees
- Location: ISAE-SUPAERO, Toulouse
- Language: English

**Information and registration**
