This module provides a comprehensive understanding of the safety assessment process for aircraft systems.

**Highlights**
- Safety evaluation for aircraft systems
- Industrial expertise
- SAE ARP4754 / 4761 guidelines

**Prerequisites**
- Aircraft architecture and basic aeronautics knowledge

**Learning objectives**

After completing this course, participants will be able to:
- Describe the system safety assessment objectives and process, and the related techniques;
- Understand the content and conclusions of a safety assessment document.

**Key elements**

- Period: December
- Estimated duration: 20 hours
- For whom: recent graduates, jobseekers and experienced employees
- Location: ISAE-SUPAERO, Toulouse
- Language: English

**Information and registration**

info.exed@isae-supaero.fr
Course content

Complex system safety:
- Fundamentals, regulations and objectives
- Types of failures
- Safety assessment

Safety and reliability studies:
- System functional hazard assessment (FHA)
- Preliminary System Safety Assessment (PSSA)
- System Safety Assessment (SSA)

Common cause analysis:
- Particular risk analysis
- Zonal safety analysis
- Common mode analysis

Case studies:
- Safety analysis
