With the “GAFAM”, artificial intelligence generates hopes and fears, and among them the fear to be “disrupted”. Nevertheless, as any new business resource or model, artificial intelligence is studied by economists who can explain the reasons of success, the impact on business models and the adoption process of ML technologies.

The purpose of this module is to focus on the principles of economics and strategy to understand how firms, industries, and management will be transformed by AI.

**Prerequisites**
- Good knowledge of your own business, basic knowledge of strategic interest of data in your business.

**Highlights**
- Principles of data economics & strategy
- Changes for data value creation
- Platform value creation and sharing

**Learning objectives**

After completing this course, participants will be able to:
- Know better about what AI means for their business
- Understand how firms and industries are deeply being transformed by AI.

**Key elements**

Dates: 7 - 10 March 2022
Duration: 28 hours, 4 days
For whom: recent graduates, jobseekers and experienced employees
Location: TBS Education, Toulouse
Course fees: 2 300 €
Language: **English**
