

AMS107b – Aircraft Safety analysis

From the Advanced Master AMS: E&M

(Aeronautical Maintenance and Support: Engineering & Management)

Highlights

- Safety evaluation for aircraft systems
- Industrial expertise
- SAE ARP4754 / 4761 guidelines

Key elements

Dates: 7 - 11 December 2020
(exam: 17 December 2020*)

Duration: 20 hours

For whom:
**recent graduates, jobseekers
and experienced employees**

Location:
ISAE-SUPAERO, Toulouse

Course fees: 2 000 €

Language: English

This module provides a comprehensive understanding of the safety assessment process for aircraft systems.

Prerequisites

- Aircraft architecture and basic aeronautics knowledge

* not compulsory

Learning objectives

After completing this course, participants will be able to:

- Describe the system safety assessment objectives and process, and the related techniques;
- Understand the content and conclusions of a safety assessment document.

Practical information and registration

Natalia Perthuis - 05 61 33 80 47 – info.exed@isae-supaeo.fr

AMS107b – Aircraft Safety analysis

From the Advanced Master AMS: E&M

(Aeronautical Maintenance and Support: Engineering & Management)

Course content

Complex system safety:

- Fundamentals, regulations and objectives
- Types of failures
- Safety assessment

Safety and reliability studies:

- System functional hazard assessment (FHA)
- Preliminary System Safety Assessment (PSSA)
- System Safety Assessment (SSA)

Common cause analysis:

- Particular risk analysis
- Zonal safety analysis
- Common mode analysis

Case studies:

- Safety analysis

Teaching methods

Teaching methods	Yes
Lectures / tutorial	X
Collaborative learning	
Flipped classroom	
Blended learning (online and face to face)	
Learning by doing	
Project-based	
Simulation	
Case study	X

Assessment

Written exam
