“Jobteaser”, The place to be:

Get direct access to job and internship offers at companies in France and abroad.

— TESTIMONIES —

The ISAE-SUPAERO Career Center is really versatile and dynamic. The people who run it listen to our needs, give us advice on our searches and help us maximize the chances of our applications' getting noticed. Furthermore, they offer many meetings with companies. They help us create networks with alumni in the professional world. These exchanges are stimulating and guide us toward a career future in line with who we are and in which we can thrive and grow.

Mathilde LE CLERC DE BUSSY,
3rd year – Engineering program.

The ISAE-SUPAERO Career Center helps students answer job and internship offers. The advisors helped me correct my résumé and my cover letter. They also coached me orally for a job interview with their simulation exercise. The Career Center puts students from the school into contact with recruiters from major companies in the aeronautics and space sector in France. Their advice helps us understand the right attitude to adopt during an interview and how to promote our skills to a recruiter.

Elliott Efraín HERNÁNDEZ MATA,
2nd year – Master of Science
