# AEROSPACE SUMMER PROGRAM

June 2 to July 4, 2025

## TARGET GROUP

The AEROSPACE Summer Program is tailored for junior and senior undergraduate students with a strong interest in space and aviation. A good background in general science, aeronautical and/or space is expected.

## ACADEMIC PROGRAM (12 ECTS / 6 US credits)

- Radiative heat transfer applied to Thermal Control of Satellites
- Launchers systems
- Civil Application for Earth Observation
- Introduction to project management in Aerospace programs including sustainable aviation, Stakes & perspectives in the NewSpace context
- Introduction to French as a foreign language and to French culture
- Visits of industries and research laboratories
- For more details, refer the syllabus of the courses

## EXPECTED INDUSTRIAL AND CULTURAL VISITS

- Airbus Defence and Space
- SAFT Batteries
- Thales Alenia Space
- Versailles and other places of interest in each city

## SPECIAL VISIT TO PARIS AIR SHOW

- International Paris Air Show 2025: a unique opportunity to discover the largest event in the industry, the latest innovations and fully experience the dream and magic of the sector
