

# HAD500 – Drone systems: design & mission

From the MS HADA  
(Helicopter, Aircraft and Drone Architecture)

## Highlights

- A review of UAS in the world
- Designing Unmanned Aerial Systems
- Drone missions

This module provides a complete overview on Unmanned Aerial Systems, with a good balance between theoretical concepts and use cases approach, be that on civil or military operations.

## Prerequisites

- Basic knowledge in Aeronautics
- System design knowledge

## Key elements

Dates: 18 - 22 January 2021

Duration: 25 hours

For whom: recent graduates,  
jobseekers and experienced  
employees

Location: ISAE-SUPAERO, Toulouse

Course fees: 2 300 €

Language: English

## Learning objectives

After completing this course, participants will be able to:

- analyze a full Unmanned Aerial System (UAS) in response to technical requirements.

## Practical information and registration

Natalia Perthuis - 05 61 33 80 47 – [info.exed@isae-supaeero.fr](mailto:info.exed@isae-supaeero.fr)

# HAD500 – Drone systems: design & mission

From the MS HADA  
(Helicopter, Aircraft and Drone Architecture)

## Course content

- UAS markets, missions and roadmaps
- Overview of UAS in the world
- Short-range UAS, VTOL UAS, MALE, HALE, UCAV
- Civil Drone: surveillance , inspection , delivery, Taxi...
- Consumer and prosumer drones
- Optionally-piloted vehicles (OPV)
- Introduction to UAS design
- Safety challenge and regulations
- Flight avionics
- Mission system & data links: LOS, BLOS, SATCOM, RVT, LTE
- Sense & avoid capabilities
- Payload selection
- Ground control station
- Introduction to micro- and mini-UAS.

## Teaching methods

Teaching methods	Yes
Lectures / tutorial	X
Collaborative learning	
Flipped classroom	
Blended learning (online and face to face)	
Learning by doing	
Project-based	
Simulation	X
Case study	X

## Assessment

- Oral exam
