

# HF410 – Humans at work

From the Advanced Master TAS Aero (Aeronautical Engineering)

## Highlights

- Cognitive ergonomics & activity analysis
- Seminars with industrialists & ergonomists

The objective of this course is to provide engineers with a high-level multi-disciplinary approach to understand how to analyze humans at work.

All courses and practical works are taught with a view to apply the acquired knowledge to the aeronautical and transportation domains.

## Prerequisites

- Master level

## Key elements

Dates:

**9 - 12 December 2019**

Duration:

**25 hours**

For whom:

**Recent graduates, jobseekers and experienced employees**

Location:

**ISAE-SUPAERO, Toulouse**

Course fees: **2 300 €**

Language: **English**

## Learning objectives

After completing this course, participants will be able to:

- Understand key principles of Human Factors and Social Psychology
- Be able to analyze a work activity with Cognitive Ergonomics tools
- Be able to interact with experts of the Human Factors and Social Psychology domains to improve flight safety.

## Practical information and registration
