

HF410 - Humans at work

From the Advanced Master TAS Aero (Aeronautical Engineering)

Highlights

- Cognitive ergonomics & activity analysis
- Seminars with industrialists & ergonomists

The objective of this course is to provide engineers with a high-level multi-disciplinary approach to understand how to analyze humans at work.

All courses and practical works are taught with a view to apply the acquired knowledge to the aeronautical and transportation domains.

Prerequisites

- Master level

Key elements

Dates:

10 - 14 January 2022

Duration:

25 hours

For whom:

Recent graduates, jobseekers and experienced employees

Location:

ISAE-SUPAERO, Toulouse

Course fees: **2 300 €**

Language: **English**

Learning objectives

After completing this course, participants will be able to:

- Understand key principles of Human Factors and Social Psychology
- Be able to analyze a work activity with Cognitive Ergonomics tools
- Be able to interact with experts of the Human Factors and Social Psychology domains to improve flight safety.

Practical information and registration

Natalia Perthuis - 05 61 33 80 47 – info.exed@isae-supaeo.fr

HF410 - Humans at work

From the Advanced Master TAS Aero (Aeronautical Engineering)

Course Content

- Cognitive and Physical Ergonomics
- Activity Analysis
- Social Psychology
- Human-human and human-system interaction
- Application Focuses: Cockpit Design, Airbus, Dassault Aviation, and start-up perspective.
