This course focuses on the five main physiological sensors dedicated to measure human performance and mental activity. The students learn the know-how of technical, measurements and signal processing issues for each of these sensors.

All courses and practical works are taught with a view to apply the acquired knowledge to the aeronautical and transportation domains.

**Prerequisites**
- Master level

**Highlights**
- Hands-on experimental work
- Use of physiological tools

**Learning objectives**
After completing this course, participants will be able to:
- Understand the operation of five sensors used to assess operators’ mental state
- Record and analyze physiological data on human operators
- Be able to interact with experts of the Human Factors and Neuroscience domains to improve flight safety.

**Practical information and registration**
Natalia Perthuis - 05 61 33 80 47 – info.exed@isae-supraero.fr

**Key elements**

**Dates:**
15 – 18 February 2021

**Duration:**
25 hours

**For whom:**
Recent graduates, jobseekers and experienced employees

**Location:**
ISAE-SUPAERO, Toulouse

**Course fees:** 2 300 €

**Language:** English
Course Content

- Initiation to Experimentation
- Ethics
- Eye-tracking
- Electrocardiography
- Electroencephalography
- Near Infra-Red Spectroscopy
- Application Focuses: Certification, Aviation/Aerospace psychology & medicine
