This course will bring you a unique understanding of structural shells analysis and modeling.

Prerequisites

- Knowledge of the Theory of beams

Highlights

- Equations of discrete dynamics
- Dynamics of solid continuous media
- Thermodynamics of thin elements
- Hybrid systems

Learning objectives

After completing this course, participants will be able to:

- Master the methods of calculation of symmetric membranes as well as the assumptions and equations of Reissner's general shell theory and their interactions.

Key elements

Dates: January 9 to 13, 2023 (exam: February 6, 2023)
Duration: 17 hours
For whom: recent graduates, jobseekers and experienced employees
Location: ISAE-SUPAERO, Toulouse
Course fees: €1,800
Language: English

Practical information and registration

Jessica Alix - 05 61 33 83 91 – info.exed@isae-supero.fr
Course content

Equations of discrete dynamics
- Newton's formalism
- Lagrange-Hamilton formalism

Dynamics of solid continuous media
- Elastodynamics
- Modal representation
- Dynamics of Reissner shells
- Complete shell equations

Hybrid systems
- Mixed fluid-structure model
- Shell/fluid interactions in the linear domain
